

BATHROOM SOLID WOOD

2019

QUALITY & VERSATILITY REDEFINING THE BATHROOM

Once again we are delighted to present our new designs...

Established 17 years ago our company has become one of the most respected names in solid wood furniture dedicated to the bathroom. Our philosophy has not changed: using only natural materials including solid oak, teak, stone and high quality cabinet fittings. In addition we employ the latest skills to create, manufacture and control our production processes.

Our focus on new designs for 2019 continues with the introduction of several collections and it is a testament to our discerning customers who demand these high standards that Line Art creations can be seen across the world.

LONGEVITY

As bathroom furniture made from inferior wood is unsuited to moisture Line Art is extremely careful in the choice of raw material using solid oak and teak for its aesthetic and long lasting qualities. Only 'Blum' high quality hinges and drawer mechanisms are selected together with 'Camar' wall brackets.

SENSUALITY

Sourced from sustainable managed forests, teak and oak are living materials with a sensual feel. The attractive colour and markings of the wood and stone further enhance this natural product. Carefully thought out Line Art furniture is designed to add to the experience of everyday living.

KNOW HOW

Line Art combines traditional techniques and technological innovation to ensure high quality standards in manufacturing. Allowing for the natural movement in the wood due to changes in humidity the furniture is assembled using mortice and tenon joints whilst the shelves and the rear of the units are made from a wood veneer.

OUR ENVIRONMENTAL POLICY

THE FOREST, OUR RAW MATERIAL

Wood is a natural resource of our planet and our raw material. We all depend on its renewal which is why Line Art is committed to a responsible development approach that starts with the choice of origin of the wood used and continues throughout the various production processes.

CONTROLLED RESOURCES

The teak and oak that we use is subject to strict worldwide management controls. Line Art uses teak managed by the Indonesian government, established over 150 years ago and FSC® certified. This certification, issued by an independent international body, authorises Line Art to buy, stock and sell from these controlled sources. In addition Line Art also manufactures furniture from recycled teak from buildings that have been demolished...

RESPONSIBLE ECONOMIC APPROACH

Line ART works continuously on recycling waste during the production processes. For example sawdust is collected to operate the kilns which are used for drying the wood.

PASSIONATE DESIGN

Functionality, form and clean lines are the hallmark of Line Art designs.

For over 15 years the company has created timeless designs from solid wood. Origin for example was created by the Mareel brothers whilst La Cabine was conceived by a newly formed design company called La Function.

OAK

Oak is one of the most sought after of woods grown in our temperate European climate being both durable and resistant to damage. It is an ideal wood for high quality cabinet making having first been steamed at a high temperature to ensure stability.

Colour variations and wood graining should not be considered as imperfections as they are part of the charm and natural character of this material.

FINISHES

Line Art offer a choice of 8 finishes included in the price of the furniture. This treatment not only allows the furniture to be customised but also protects it from water splashing and temperature changes.

CARE

Your solid wood furniture is a unique piece which requires careful and regular cleaning and maintenance with the appropriate products (see page 112).

wood care see p 112 - the colours are only a guide, please see Oak sample finishes

TEAK

Renowned for its timeless beauty teak is one of the most durable of tropical hardwoods. It is a wood that graces the finest yachts chosen not only for its appearance but also for its water resistant qualities even under the most extreme conditions. Unlike other woods teak naturally contains its own oil making it the ideal choice for the bathroom. Colour variations and wood graining should not be considered as imperfections as they are part of the charm and natural character of this material.

FINISHES

As teak is essentially a dense hardwood and naturally contains its own oil Line Art furniture can be supplied without any further treatment in the teck brut or natural finish.

However, if further protection or an alternative look is required 5 finishes are available as an option at an additional cost of +15% as shown below.

CARE

Your solid wood furniture is a unique piece which requires careful and regular cleaning and maintenance with the appropriate products (see page 112).

Wood care see p 112 - These colours are only a guide, please see teak sample finishes
Natural teak as per price list. Optional oiled finishes +15%.

MAINTENANCE

WOOD CARE

Your solid wood furniture is a unique piece which requires careful and regular cleaning and maintenance with the appropriate products.

Line Art offers 2 types of wood: Teak and Oak.

We recommend the following:

- **Avoid leaving liquids on any flat surfaces and wipe water splashes away after use.**
- **Avoid the use of corrosive or acid based cleaning products.**
- **Clean the furniture regularly with the appropriate products (as shown)**

OAK FURNITURE – OILED FINISHES

- For regular cleaning please use a mild soap ref: 0005S.
- For specific maintenance where marks or stains need to be removed we recommend a Tannin remover ref: 0005T.
- When the surface of the wood loses its sheen this can be restored using a finishing oil ref: 0005R

TEAK FURNITURE – OILED FINISHES

- For regular cleaning please use a mild soap ref: 0005S.
- For specific maintenance where marks or stains need to be removed we recommend a degreasing agent ref: 0005D.
- When the surface of the wood loses its sheen this can be restored using a finishing oil ref: 0005R or 0005RB for the limewashed/ceruse blanc finish.

TEAK FURNITURE - NATURAL FINISH

- For regular maintenance please use mild soapy water cleaning in the direction of the grain.

We are unable to accept responsibility if inappropriate cleaning products have been used.

LACQUER FINISH

The white drawer fronts are finished with 4 layers of lacquer polished after each coat to ensure a perfect and highly durable surface. For regular cleaning do not use abrasive cleaners or sponges particularly those containing acetone, white spirit or solvent. Use a soft cloth or paper towel with warm water wiping in a circular motion before drying.

Bluestone

Twilight

White Carrara

Anstrude

NATURAL STONE

Line Art combines solid wood with countertops and basins in natural stone.

Natural stone is often preferred for its individual appearance and practicality having been treated to prevent any water absorption.

Variations in the colour and veining of these natural stones should not be considered as defects as this is a feature of the charm and unique character of these materials.

We recommend the following:

- **Wipe any water splashes after use in order to avoid lime deposits.**
- **Avoid the use of any acid based products which can be corrosive and cause permanent marking of the stone.**

REGULAR MAINTENANCE :

We recommend Lithofin Easy Care which cleans, protects and maintains the appearance of the natural stone.
