The closet system can be provided with solo partition pivot door or our new Flo Sliding glass door that is made with a structural aluminium profile (bronze powder coated) with a minimal thickness available 30mm and bronze mesh glass thickness 9 mm, that delivers the maximum simplicity and stylistic solutions to spread transparency, opacity and reflections, rails matching the ceiling.

The bronze mesh glass is composed of two sheets of transparent extra clear glass with two transparent PVP layers with silk fabric in between, coming up with the latest trendy look.

Silk system can be in standard and customised inner units organization that meets your needs.
