01. OUR STORY

Hello there our dear audience, throughout this company profile it would be our pleasure to present to you a glimpse of our institution. Our journey began in the year 1992, under the name of Al-Khan warehouse. Located in the third industrial area in salah salem. The market back then was challenging so was our mentality, we started to take in any manufactured wood projects, that included interior and exterior spaces. we did not specialize in any sector. But, we had a vision back then, We wanted to be among the leading companies specialized in the wood industry, and so we did, in the year 2007.

02. ABOUT US

We always provide our clients with various services other than delivering the final product; Our CEO, Hazem Al-Kady, is keen to provide consultation to the clients with different perspectives regarding the design and other aspects. House of Al Khan has always been persistent on studying, analysing and executing the work according to the old school criteria, which ensures a detailed perspective throughout the studying of the project and lessens any error possibility.

One of our core values and the main success factor is our employees, which are considered and treated as family members, we have a very low turnover rate and a high employee satisfaction. Receiving consistent positive feedback after delivering the final product created a high

customer loyalty and wide word of mouth. And because we care about our clients, we offer them a follow up service after the delivery, and to ensure and maintain an honourable reputation we offer a lifetime guarantee to our products against any manufacturing defects.

House of Al-Khan team members have been in the field for 28 years; therefore, we have a solid experience in so many different fields, as the wood work is frequently the last service to be delivered in any project, we built a massive experience to any sector that connects to our work, In the end its a chain of services and if any of the circles is done incorrectly all of the following would end up at a low quality, so we make sure that our work is added up on a neat structure.

Kempinski

HOTELIERS SINCE 1897

A conference room with a dark wood-paneled wall. In the center, a large black screen displays the Kempinski logo in white cursive script, with the text "HOTELIERS SINCE 1897" below it. The room is furnished with several round tables covered in gold cloths, each surrounded by white upholstered chairs. Each table is set with a white placemat, a glass, and a water bottle. A white flipchart stands to the right of the screen. The room is lit by recessed ceiling lights.
