Alzaluce - metal table lamp with fabric cable, switch and 2 poles plug

Height: 5 cm

Finish: Brushed bronze

Product short description:

Here at Creative-Cables our versatile metal table lamps with fabric cable are amongst of our most admired lighting products. Alzaluce is a newer option with a slim stem in a variety of lengths that's proving popular with our customers. The stem and lamp holder finish match the base for an appealing look without a lampshade.

What's exciting about this top quality product is it's possible to create a table lamp that's exactly what you want. Not only do you get to choose the type of finish and cable, you also select the length of the stem.

You can choose between different metal finishes options. For each of these, we've included a matching cable. If you're feeling really creative you can let us know if there is another wiring colour or fabric you prefer and we'll supply that for you.

Please be aware that a light bulb is not included with this product, otherwise, it's ready to use. We recommend our Globe XL G125 light bulb.

Product description:
