## Sarè - Metal wall fairlead fixing for textile cable - Brass

### **Product short description:**

Creative-Cables was born in Turin, Piedmont, and in Piedmontese "Sarè" means to tighten, close, and even screw. What better name for the newly born line of decentralizers?

The Saré metal wall fairleads are the ideal accessory for fixing your textile cables to walls or ceilings for your chosen lighting solution.

Thanks to this small accessory with a polished brass finish you can create linear or creative designs with our cables and bring light where it is missing.

Solid aluminium, complete with characteristics of an embossed knurling grip on the cap whilst remaining small in size, the Saré decentralizer is available in all polished metal finishes within the Creative-Cables component range: match it with ceiling roses, lamp holders, cable clamps and extensions to create lamps and lighting solutions tailored by you to compliment any needs and style.

Thanks to its adjustable screw closure, this wall fairlead is suitable with the diameters of a 2 or 3 core cable, both in round or twisted. Saré in its brass finish has the elegance of a golden button: We suggest incorporating them with our Vertigo HD cables in order to create an original optical effect.

**Attention! This product is not compatible with our large section cables and cords.**

**Product description:**

Ceiling or wall decentralizer in polished brass aluminium
