Product description:

How to choose the type of coating: Rayon, Cotton or Linen?
Many customers ask us: what is the difference between the coatings Rayon, Cotton or linen? The answer depends entirely on the type of effect you want to achieve. Cotton and Linen have a matt and natural effect; the Rayon instead enhances color brilliance.
Often it is uses to combine the natural effect with vintage items such as brass, copper, iron or porcelain, while Rayon is

coupled with colored metal, with chrome or satin trims.
