

INT-KLFR-SSW

INTEGRA ALARM SYSTEM KEYPAD

The **INT-KLFR** keypad has been designed for users opting for traditional alarm system operating interfaces, however, at the same time expecting solutions of attractive appearance. Moreover, the in-built proximity card reader allows for system operation without the necessity to remember passwords.

- backlit keyboard and screen
- system status LEDs
- NAPAD (intrusion), POŻAR (fire) and POMOC (help) alarms activated via keyboard
- acoustic indication of selected system events
- 2 programmable inputs (with 3EOL configuration support)
- RS-232 connection to cooperate with the **GUARDX** program
- in-built proximity card reader for system operation
